Introduction to the Concordance of Statistical Classifications of Commodities Imported into the United States

This publication presents separate correlations between the 1978 Schedule A and TSUSA numbers and between 1977 and 1978 Schedule A classifications. It is intended as a guide to assist users in relating 1978 and prior year import statistical data in terms of Schedule A.

The United States import statistics are collected in terms of the Tariff Schedules of the United States Annotated (TSUSA) and are then rearranged and summarized for publication purposes in terms of Schedule A, Statistical Classification of Commodities Imported into the United States. Effective with the statistics for January 1978, Schedule A was revised to reflect the changes in the Standard International Trade Classification (SITC) Revision 2. Prior to this, Schedule A was based on the framework of the Standard International Trade Classification, Revised.

The 1978 import statistics issued in foreign trade publications FT 135, FT 150, FT 155, FT 900, and FT 990 and the monthly microfilm report IM 150/155, will be presented in terms of the 1978 Schedule A classifications. Computer outputs which reflect import data in terms of TSUSA numbers are data bank tapes, and selected tabular outputs whether hard copy or microform, such as IM 145X, IM 145Y, IM 145A, IM 145V, IM 146 and other related tabulations.

Table 1. Correlation Between the 1978 Schedule A Commodity Numbers and the 1978 Tariff Schedules of the United States Annotated—Continued

(This table lists the 1978 Schedule A commodity numbers, descriptions, and units of quantity with the related 1978 Tariff Schedules of the United States Annotated (TSUSA). The Schedule A numbers are based on the Standard International Trade Classifications (SITC), Revision 2, effective with January statistics. The TSUSA list includes numbers that became effective January 1, 1978 and those numbers subsequently issued through August 1978)
